

## Why Choose Dr. Cheng?

- ✓ PhD in Neurosurgery, Leader in Regenerative Medicine & POF Treatment
- ✓ Specializes in personalized fertility restoration protocols to improve ovarian reserve, follicular activation, and hormone rebalancing.
- ✓ Pioneered the "Ovary-Endocrine-Fertility" MDT approach, surpassing limitations of conventional hormone replacement therapy (HRT).
- ✓ Successfully restored menstrual cycles in 100+ POF patients, including advanced-age ( $\geq 40$  years)

Performed China's first CT-guided stereotactic brain transplantation surgery.

Extensive experience in neurodegenerative conditions using advanced transplantation techniques.

## Premature Ovarian Failure patients' biggest concern

- How to improve egg quality or delay ovarian function decline?
- Is long-term hormone replacement therapy (HRT) safe? (Cancer risk? How long should it be used?)
- Traditional Chinese medicine, stem cell therapy, DHEA, etc. - are they effective?

## Our Solution: Stem Cell Therapy (1000+ Cases Since 2012)

### ► Key Advantages Over Conventional Treatments:

Root-Cause Repair: Stem cells regenerate ovarian tissue/vessels vs. HRT's symptom masking.  
 Fertility Restoration: Reactivates primordial follicles, improves IVF success rates.  
 Reduced HRT Dependence: Stimulates endogenous hormone production.  
 Anti-Aging Benefits: Slows ovarian fibrosis, improves skin/bone health.

### ► Clinical Outcomes:

Ovarian Function: Resumed ovulation; natural pregnancies achieved.  
 Symptom Relief: Reduced hot flashes, insomnia, irritability (80% patients).  
 Systemic Improvements: Skin rejuvenation, energy boost, metabolic normalization.

## Our Unique treatment method differs from ordinary stem cell treatment

- Intravenous Infusion
- Laparoscopic Ovarian Injection (Direct visualization)
- Interventional Arterial Infusion (Ovarian & uterine artery catheterization, as illustrated below)

## • Mechanism of Action •

- Secretes cytokines to inhibit apoptosis and repair ovarian tissue.
- Homes to damaged sites, restoring or replacing lost function.
- Modulates immune response, promoting self-repair of injured tissue.
- Regenerates ovarian stroma, preventing fibrosis.
- Differentiates into vascular endothelial cells, enhancing blood supply.
- May regulate gene expression to improve ovarian function.

## Safety & Advantages

Precision Delivery: Laparoscopic/arterial targeting minimizes off-site effects.

Holistic Benefits: Addresses POF symptoms + systemic aging (skin, bone, energy).

Long-Term Tracking: Personalized follow-up protocols monitor ovarian reserve.

## • Real Cases of Receiving Treatment •

### Patient Profile

**Name:** Ms. Yi

**Age/Gender/Nationality:** 46-year-old, female, Chinese

**Background:** Due to excessive work demands, irregular daily routines, and physical overexertion, the patient developed suboptimal health conditions.

### Treatment Timeline:

07/2014: Underwent concurrent stem cell therapy with her spouse in Beijing

2015: Achieved successful natural conception

06/2016: Delivered a healthy baby girl via spontaneous vaginal delivery

11/2017: Both partners received a second course of stem cell therapy

### Pre-Treatment :

#### 1. Dermatological manifestations:

- Xerosis (dry, flaky skin)
- Increased fine wrinkles on face and neck
- Multiple chloasma patches on body

#### 2. Reproductive health issues:

- Irregular menstruation with scanty flow
- Cold intolerance with cold extremities
- Documented fertility challenges

#### 3. Energy/metabolic dysfunction:

- Persistent fatigue
- Easy fatigability

#### 4. Sleep disturbances:

- Severe insomnia
- Disrupted sleep architecture with frequent dreaming

#### 5. Gastrointestinal complaints:

- Functional dyspepsia
- Cold-food induced diarrhea
- Chronic bloating, belching, acid reflux, and constipation

### Post-Treatment:

#### 1. Cutaneous improvements:

- Restored skin elasticity and texture
- Resolution of fine wrinkles
- Significant fading of chloasma

#### 2. Reproductive normalization:

- Regular menstrual cycles with normal flow
- Improved thermoregulation ("internal warming" sensation)
- Successful natural conception and delivery

#### 3. Energy restoration:

- Markedly improved vitality
- Reduced fatigability

#### 4. Sleep quality enhancement:

- Shortened sleep latency
- Increased deep sleep duration
- Circadian rhythm normalization

#### 5. Gastrointestinal recovery:

- Improved digestive function
- Resolution of bloating and constipation
- Tolerance to previously problematic foods

## Patient Profile

**Name:** Ms. Wei

**Age/Gender/ Nationality:** 47-year-old, female, Chinese

### Background:

A nulliparous woman of advanced reproductive age presenting with secondary infertility despite regular menses and normal menstrual flow. Previous treatment included 3 ovulation induction cycles and 4 unsuccessful embryo transfers. Underwent combined intravenous and intrauterine stem cell therapy in December 2018, resulting in successful oocyte retrieval.

### Pre-Treatment :

- 1. Marked physical deconditioning with exertional fatigue**
- 2. Multisensory decline (visual, auditory, olfactory acuity)**
- 3. Significant osteoporosis with associated lumbosacral pain**
- 4. Cutaneous manifestations:**
  - Xerosis with hyperpigmentation
  - Wrinkle proliferation
- 5. Vasomotor symptoms:**
  - Palmar-plantar hyperthermia
  - Emotional lability
- 6. Biochemical markers:**
  - Elevated FSH
  - Diminished AMH
- 7. Sonographic findings:**
  - Absent follicular activity in right ovary

### Post-Treatment:

- 1. Improved exercise tolerance and stamina**
- 2. Restored sensory acuity**
- 3. Resolution of osteoporotic pain**
- 4. Dermatological improvements:**
  - Skin brightening and increased elasticity
  - Wrinkle reduction and pigment clearance
- 5. Stabilized mood and thermoregulation**
- 6. Normalized endocrine profile:**
  - FSH reduction
  - AMH elevation
- 7. Restored ovarian function:**
  - Follicular reactivation in right ovary

## • Why Choose Us? •

**World Class Care:**  
30,000+ patients from 30+ countries.

**VIP Services:**  
24/7 private physicians, luxury concierge (transport/hotel).  
Multilingual support (Arabic/English), halal meals, prayer rooms.

**Technology & Expertise:**  
Led by Dr. Cheng's team; integrates Western and Traditional Chinese Medicine.

If you have any questions or need to know more about the cases, please feel free to consult us and get a free 1-on-1 treatment plan
